

Food Processing Band Saw

A450

AKIYAMA

- 1. Easy band saw blade operation by tension handle**
- 2. Easy cleaning with the full release table**
- 3. Power and quietness due to direct drive motor**
- 4. Stable band saw blade rotation by double flanged wheels**
- 5. Fine cut surface with high speed saw blade rotation**

Food Processing Band Saw

A450

High-performance machine for a wide range of applications

Compact band saw machine ideal for cutting block meat of tuna, marlin tuna, and bonito into small pieces. Also suitable for cutting frozen meat, lobster, and other non-fish products.

Easy band saw blade removal and tensioning

The tensioning and detaching of the band saw blade by the tension handle mechanism dramatically reduces work compared to conventional machines.

Safety Devices

The double flanged wheel makes it difficult for the band saw blade to come off during operation.

Fully open body for easy cleaning

Covers and wheels can be easily removed. In addition, the table can be opened to the left or right for easy cleaning

Motor Directly Connected Drive

Lower wheel is directly connected to the motor and rotates directly. This eliminates power loss, reduces the rotating noise of the band saw and vibration, and dramatically improves the quietness of the machine.

All stainless steel bodies

Durability is also excellent. Rust-resistant and improved sanitation. The stainless-steel material is SUS304 standard.

Specifications

Max cutting height	450mm
Dimensions (table)	730x980mm
Height (table)	880mm
Dimensions (machine)	977x980x1870mm
Weight	280kg
Power source	200V 3-phase 50/60Hz
Motor	0.75 - 2.2kw 4P
