

The machine which cuts crab's and claw round

OS1

Best crab-shell cutter that cuts without affecting the dignity of the meat.

Easy crab-shell cutting by just placing the leg to cutting and rotating it.

Best also for preparation of different dishes.

Easy adjustment of cutting-depth.

Since the cutting depth can be adjusted freely by simply adjusting plastic crab leg/claw holder, any kind of crab can be processed with this machine.

Compact and space-saving.

The space saving design only 500mmx550mm. It weighs about 36kg and it is easily movable.

All stainless steel, cleaning is easy.

The main part is all stainless steel. Washable with cold water and is preminent to corrosiveness-proof.

Horizontal side cutting is possible.

Using a supplied plastic leg/claw holder. You can do horizontal side cutting. Just replace the plastic holder and you can do excellent cutting.
